Profile

Skilled Web Developer with experience in multiple languages and frameworks. Hands on experience with multiple open source libraries and projects, as well as multiple enterprise level platforms. Passion for cutting edge web technologies and practices.

Skills

- JavaScript
- Python
- Windows
- Bootstrap
- VirtualBox
- HTML
- Perl
- Linux
- CouchDB
- VMWare
- CSS
- Eclipse
- Mac OS
- MySQL
- Sublime Text
- LESS
- Netbeans
- jQuery
- MVC

Accomplishments

- Automated the processing of Agency and Agency Management photos and distributing them in the needed formats and resolutions across multiple business areas and vendors.
- Automated and reduced redundancy in the technical review and publishing of content via the TeamSite content management system, reducing the hands on time needed to publish content.
- Created a dynamic large scale batch process to update over 5000 links to corporate training modules across all internal web sites. The links changing were dynamic and required translation from old to new system before updating. The final batch process required no human intervention.
- Created the first completely responsive web interface for an automation hardware platform enabling users of that hardware to control and monitor their systems on any mobile, tablet, or computer device.

Experience

PROGRAMMER ANALYST, COUNTRY FINANCIAL – 2013-PRESENT

Responsible for Responsive Web Development of the Agency Force portal and associated applications. Worked with Business areas to develop requirements, test, and design the interface.

WEB ADMINISTRATOR, COUNTRY FINANCIAL – 2007-2013

Responsible for Administrating the Content Management platform for all Internal and Customer facing web sites for the company. Trained users in the platform as well as automated tasks associated with the websites. Also performed Web Development tasks when needed and insured compliance and standards across all of COUNTRY's web properties.

TECHNICAL EDITOR, TEK SYSTEMS – 2006-2007

Responsible for Change Management, internal Website Development, and Documentation writing for a server upgrade packaging group. Also helped to schedule and coordinate enterprise wide scheduling of all Windows, UNIX, and Linux server patching.

SYSTEMS ADMINISTRATOR AND WEB DEVELOPER, MIDILLINI COMMUNICATIONS – 2003-2010

Managed Linux based website hosting environments and developed web sites and applications for small to medium businesses across the United States

Education

Illinois Wesleyan University – Music Education 1996-1999

Lebanon Community High School - High School Diploma 1996
